

Salon Detail Page - Full UX and Technical Enhancement Guide

1. Information Hierarchy and UX Flow

Goal: Present data in the order users make decisions.

Suggested order:

- Hero image with badges (Premium / Discount)
- Name + Rating + Favorite/Share
- Services list (Price, duration, CTA)
- Artist selection (optional)
- Description + Features (Wi-Fi, Parking, etc.)
- Map and Location
- User reviews

2. Service Tab - Intuitive Layout

Current: Only price and brief text.

Suggestions:

- Use icons for service types
- Display: Duration, Price, One-line summary
- Book Now button with high contrast, aligned right

3. Artist Profile Cards - Clean UX

- Include professional headshots if available
- Hover or tap shows short bio
- 'View Availability' button opens calendar
- Consider mini performance chart next to star rating

4. Gallery Tab - Rich Media

- Allow user-uploaded photos
- Add filters like 'French', 'Nude', 'Floral'
- Zoom and swipe support for gallery images

5. Mobile Navigation UX

- Bottom navigation auto-hides on scroll

- Tab menu can switch into scrollable or segmented controls

6. Booking Flow with Calendar Integration

Flow:

1. Tap service
2. Choose artist or auto-assign
3. Select time slot using calendar picker
4. Confirmation screen with animation
5. Prompt to 'Add to Calendar' for Google or Apple

7. Reviews Section - Building Trust

- Include full reviews with text and photos
- Highlight helpful reviews
- Add 'Was this review helpful?' option
- Star rating summary with breakdown chart

8. Bonus - AI Beauty Advisor Integration

- Add a small chat assistant at the bottom
- Users can ask: 'Is this style right for me?'
- AI gives tailored response based on user profile
