

Nail Art Match (NAM) - App Concept & Technical Brief

1. Home Page Design

- Top Navigation with Logo, Notification Icon, and Location Info
- Story Section with Circular Thumbnails (Popular, New, Today Only, Discounted)
- Categories (2x4 Grid): French Manicure, Gel Nails, Nail Stickers, etc.
- Featured Salons (Card Style): Image, Name, Star Rating, Reviews Count
- Banner Section for Campaigns/Discounts
- Bottom Navigation: Home, Search, My Bookings, Wallet, Profile

2. UI & Design Style

- Colors: Soft Pink (#F9E0E7), Nude (#F5F1EB), Lavender (#D6C3E5), White, Dark Text (#333333), Gold (#FFD700)
- Fonts: Playfair Display/Montserrat Bold for titles, Lato/Poppins/Open Sans for text
- Visuals: High-quality images of salons and nail art portfolios in natural light

3. User Flow

1. User opens app and shares location
2. Selects a salon from the home screen
3. Views nail artists working in the salon
4. Selects an artist, views portfolio and services with pricing
5. Chooses a service and selects time based on availability
6. Sends booking request, artist confirms, notification is sent to the user
7. Payment is processed via stored credit card upon confirmation

4. Technical Requirements

- Platform: iOS & Android (Flutter or React Native recommended)
- Location Services: Google Maps API, location-based sorting
- User Types: Separate login for customers and artists/salons
- Notifications: Push (Firebase)
- Payment System: Integration with iyzico / Stripe / PayTR
- Calendar: Artists define availability, users see open slots
- Backend: Firebase or Node.js + MongoDB, Admin Panel for management

Nail Art Match (NAM) - App Concept & Technical Brief

5. Extra Recommendations

- Start with MVP: core features like booking, viewing salons/artists, and payment
- Filter options: price, rating, location, service time
- Review and rating system is critical for user trust
- Add campaign/promotions and subscription system later
- Potential Instagram/TikTok integration for artist portfolios
